1. The first part of the paper is devoted to a general  
discussion of the principles of the theory of  
the function of the mind. It is shown that the  
mind is not a passive organ, but an active  
organ, and that it is capable of receiving  
information from the outside world, and of  
processing it in a way which is determined  
by the nature of the information itself. It is  
also shown that the mind is capable of  
creating new information, and of using it in  
a way which is determined by the nature  
of the information itself. This is the basis  
of the theory of the function of the mind.  
2. The second part of the paper is devoted to  
a discussion of the principles of the theory of  
the function of the mind. It is shown that the  
mind is not a passive organ, but an active  
organ, and that it is capable of receiving  
information from the outside world, and of  
processing it in a way which is determined  
by the nature of the information itself. It is  
also shown that the mind is capable of  
creating new information, and of using it in  
a way which is determined by the nature  
of the information itself. This is the basis  
of the theory of the function of the mind.  
3. The third part of the paper is devoted to  
a discussion of the principles of the theory of  
the function of the mind. It is shown that the  
mind is not a passive organ, but an active  
organ, and that it is capable of receiving  
information from the outside world, and of  
processing it in a way which is determined  
by the nature of the information itself. It is  
also shown that the mind is capable of  
creating new information, and of using it in  
a way which is determined by the nature  
of the information itself. This is the basis  
of the theory of the function of the mind.  
4. The fourth part of the paper is devoted to  
a discussion of the principles of the theory of  
the function of the mind. It is shown that the  
mind is not a passive organ, but an active  
organ, and that it is capable of receiving  
information from the outside world, and of  
processing it in a way which is determined  
by the nature of the information itself. It is  
also shown that the mind is capable of  
creating new information, and of using it in  
a way which is determined by the nature  
of the information itself. This is the basis  
of the theory of the function of the mind.  
5. The fifth part of the paper is devoted to  
a discussion of the principles of the theory of  
the function of the mind. It is shown that the  
mind is not a passive organ, but an active  
organ, and that it is capable of receiving  
information from the outside world, and of  
processing it in a way which is determined  
by the nature of the information itself. It is  
also shown that the mind is capable of  
creating new information, and of using it in  
a way which is determined by the nature  
of the information itself. This is the basis  
of the theory of the function of the mind.
